Polarity Switchable uniboot LC-LC (flat Clip) Fiber patch cord

Description

Polarity Switchable uniboot LC-LC (flat Clip) Fiber patch cord is assembled with upgraded flat clip uniboot LC connectors for a high density data center environment, like in UHD series products. It has thinner body and can reduce bulk fiber optic cabling by 50% when compared to traditional duplex cables.

The **Polarity Switchable LC uni-boot Patch cable** is a unique design that allows to switch polarity without using any tooling. It is commonly used in data centers where cable counts are high and space limited.

OMC's **integrated reverse-polarity LC uniboot assemblies** meets the ultra high-density space requirements and enables quick and easy polarity management as well. The flat clip connector design makes it easy to engage and dis-engage from even the most compact panels, while Corning bend insensitive fiber features ultra bendable performance and can greatly reduce outages and degradation in systems caused by severe bending problems.

PS: The difference of OM4 and OM3 fiber mode as the following

1. OM4 was developed specifically for VCSEL laser transmission and allows 10 Gig / second link distances of up to 550 Meters (compared to 300M with OM3).
2. The effective modal bandwidth for OM4 is more than double that of OM3.
3. For OM4 patch cable it is 4700 MHz.km while for OM3 it is 2000 MHz.km.
