## LC Female to ST Female Hybrid fiber adapter

### Description

**Female to Female Hybrid Adapter** are developed to couple and mate two different (hybrid) connector plugs. The housing of the Adapters of the last generation has a reference key for the right position coupling and zirconia or phosphorus bronze split sleeve for high alignment.

This **LC(Female) to ST(Female)** SC footprint type fiber optic hybrid adapter, Converting LC connector to ST Connector. Variable LC interface conversion ST interface. Provided a simple and reliable solution for connecting two different optic fiber transmission joints.
